

UPTIME SCORECARD

Check each box only if the statement is 100% correct. Your **Uptime Score** is calculated by adding the number of boxes checked.

-
- Every technician has a calibrated handheld meter or tester within arm's reach of their primary work area.
 - We have a current inventory of diagnostic consumables (leads, probes, test points, calibration aids) and replace them on a schedule — not when they fail.
 - When a board, panel or assembly comes in for diagnosis, we have the soldering and desoldering equipment to rework it on-site without sending it out.
 - We have ESD-safe diagnostic procedures and equipment for board-level or static-sensitive work.
 - Every technician working on detail-level inspection (board work, fine repair, calibration) has appropriate magnification and task lighting at their workstation.
 - We have the hand tools (tweezers, picks, brushes, scissors) and cleaning materials needed for prep and close-in inspection work.
 - Our inspection process accounts for static control when the work involve sensitive electronics.
 - Every technician has standing access to current, in-spec PPE for their work — not just what's left in the cabinet.
 - Our PPE and protective consumables (gloves, eye protection, ESD wristbands, sealants/tapes for safe handling) are replenished on a standing schedule or program, not reactively.
 - Static-sensitive work is performed in a properly equipped ESD-protected environment with mats, wristbands and grounded workstations.
-

YOUR UPTIME SCORE

8 - 10

Solid. You're ready when something fails. Walk through the audit with your TestEquity/Hisco rep to identify which categories are due for refresh and what's changing in product or service availability.

5 - 7

Manageable gaps. kind of issues that compound over time. A 30-minute conversation with your rep can map a refresh plan.

<5

Critical exposure. The audit surfaced multiple gaps that affect uptime, rework, and safety. Talk to your rep this week.

Are there some gaps you need to fill immediately? Contact a TestEquity expert to get clear pricing, realistic availability, and expert guidance on the products you need.
